

CAG Executive Meeting – 5/9/13

Are there any documents coming out between now and Aug 1 for RM10.9?

CPG is unwilling to negotiate on removal off of Ella's property – want total mass removed in front of that property. If can't have that, want decision made that after top layer is removed, if find lots of contamination then dig deeper.

Ella has been asked to sign a release, has not signed.

How are they going to protect from dioxin moving up and down river after it is exposed? – Ella has not gotten an answer.

Should have started talking to Ella earlier; she would not have been so unhappy now.

Who is Tidelands Commission and what is their authority?

June 5 public info meeting on RM10.9

- Link field sampling results to RM10.9 Removal – removal will prevent the worst contamination from coming up on field.
- David commits to EPA taking notes during meeting to give CAG idea of issues discussed.

Bring big map of LPR to show RMO

Briefings on model results in August and risk assessment results in October

This is what will be in the FFS vs. This is what will NOT be in FFS

- Where will processing facility be?
- Where will DMM be disposed of?

How can CAG evaluate EPA vs. CPG dueling modeling results?

List of key differences between EPA and CPG modeling approaches

Bring different groups within EPA to focus on Passaic River holistically – etc... CSOs & flooding

Formed technical committee and outreach committee

What did Ella send in response to TASC? Most recent document with comments on CPG proposal?
